

Patient Notification for 3D Mammography

We believe that 3D mammography is far superior to 2D, however it is your choice what kind of mammogram you receive. We believe that your insurance may not pay for 3D at this time.

Although, every insurance policy is different, it is your responsibility to know how your insurance will pay for your routine screening mammograms. **If you decide to add 3D to your routine mammogram, we will only charge you an additional \$50 if your insurance does not cover the 3D portion.***

***Although most insurances cover preventative care, if your insurance policy does not cover preventative care, you will have additional charges for the 2D portion of your mammogram.**

Please select one option below:

_____ I wish to have a **2D** Screening Mammogram (CODES G0202 and 77052).

-OR-

_____ I wish to have a **3D** Screening Mammogram (CODES G0202, 77052, and 77063).

Advance Beneficiary Notice of Noncoverage (ABN)

NOTE: If your insurance does not cover 77063 (3D) you may have to pay. Insurance does not pay for everything, even some care that you or your healthcare provider have good reason to think you need. We expect that your insurance may not pay for 77063 (3D).

Signing below means that you have received and understood this notice.
