

# Sherrie Thomas, M.D., FACS

Dr. Thomas is a board-certified surgeon from the American Board of Surgery. She specializes in the diagnosis, treatment, and management of diseases of the breast, including benign and malignant diseases. She takes each of her patients from diagnosis to recovery with compassionate care using the latest technologies. She performs both ultrasound guided and stereotactic guided breast biopsies to achieve a diagnosis. She has the skill and expertise to provide leading-edge treatment with desirable cosmetic outcomes.

Dr. Thomas has an experienced team that works together to treat each breast cancer patient with an individualized plan.

## Personal Information

My focus is making sure my patients have a full understanding of their treatment plan while providing a compassionate environment and team approach to fight cancer. Their fight is my fight, and I want my patients to feel confident that they are not in this alone. My goal is to be with them for each step, from diagnosis to recovery, providing the information, support and expertise needed to face breast cancer with confidence.

It's an honor to provide my breast cancer patients with individualized, compassionate surgical care that is always state of the art.

## Quotes from Patients

"I knew I had found my treatment home the moment we met. It would have been enough for you to be professionally excellent and competent both in reputation and skill, but you were more than that. You were warm and comforting and confident and

## Quotes from Patients

excellent. A woman who knew her stuff and conveyed that vast knowledge and skill in a way that made me know I was in the best possible hands.”
